

A Pro-Grade Order Book DEX for Everyone

Bringing CEX-speed and institutional-grade depth to the "All in Web3" ecosystem

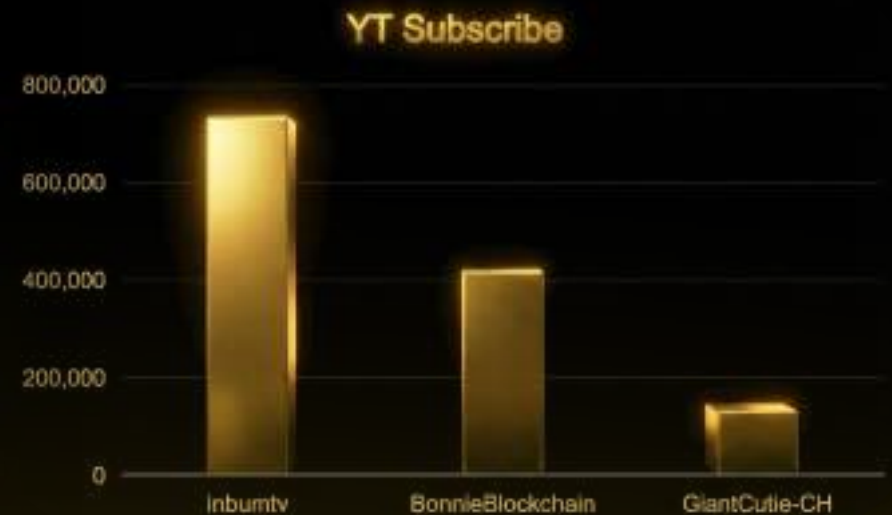

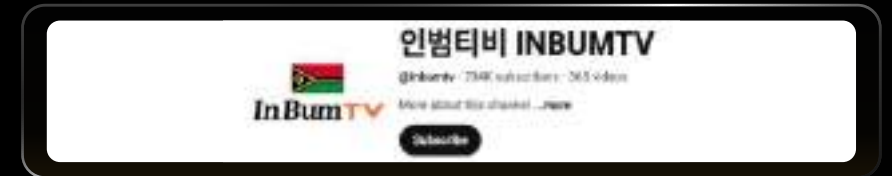

The Anchor of Digital Financial Communities

Founder's Journey: 15 Years Of Community Sovereignty

Founder's Journey — 15 Years Of Community Sovereignty

- **#1 Ranked Regional Creator (2008–2014):** Held the **top ranking** across major Asian live-streaming platforms for **6 consecutive years**.
- **Authority in Derivative Trading (2021–Present):** Successfully pivoted to real-time analysis and trading of U.S. Equities and NASDAQ Derivatives.
- **Dominant Community Reach (2024):** Ranked **#1** in the Asian Investment Category on YouTube, with peak live concurrency exceeding **20,000+ viewers**.
- **Strategic Moat:** Proprietary access to a high-trust, high-loyalty financial community ready for large-scale Web3 migration.

From Validated Growth To ADEN

- **From Beta to Sovereignty:** Transitioned from a white-label model (**\$1B Daily Volume / 3k DAU**) to a fully sovereign protocol to eliminate structural risks and revenue leakage.
- **Technological Re-alignment:** Re-engineered the platform by integrating the InbumTV's **\$150B+ proven volume** engine with Gate's native high-performance infrastructure.
- **The Vision:** ADEN emerges as a Tier-1 Perp DEX, combining institutional-grade tech with a proprietary, zero-cost acquisition funnel.

**Community
Sovereignty**

 **ADEN**

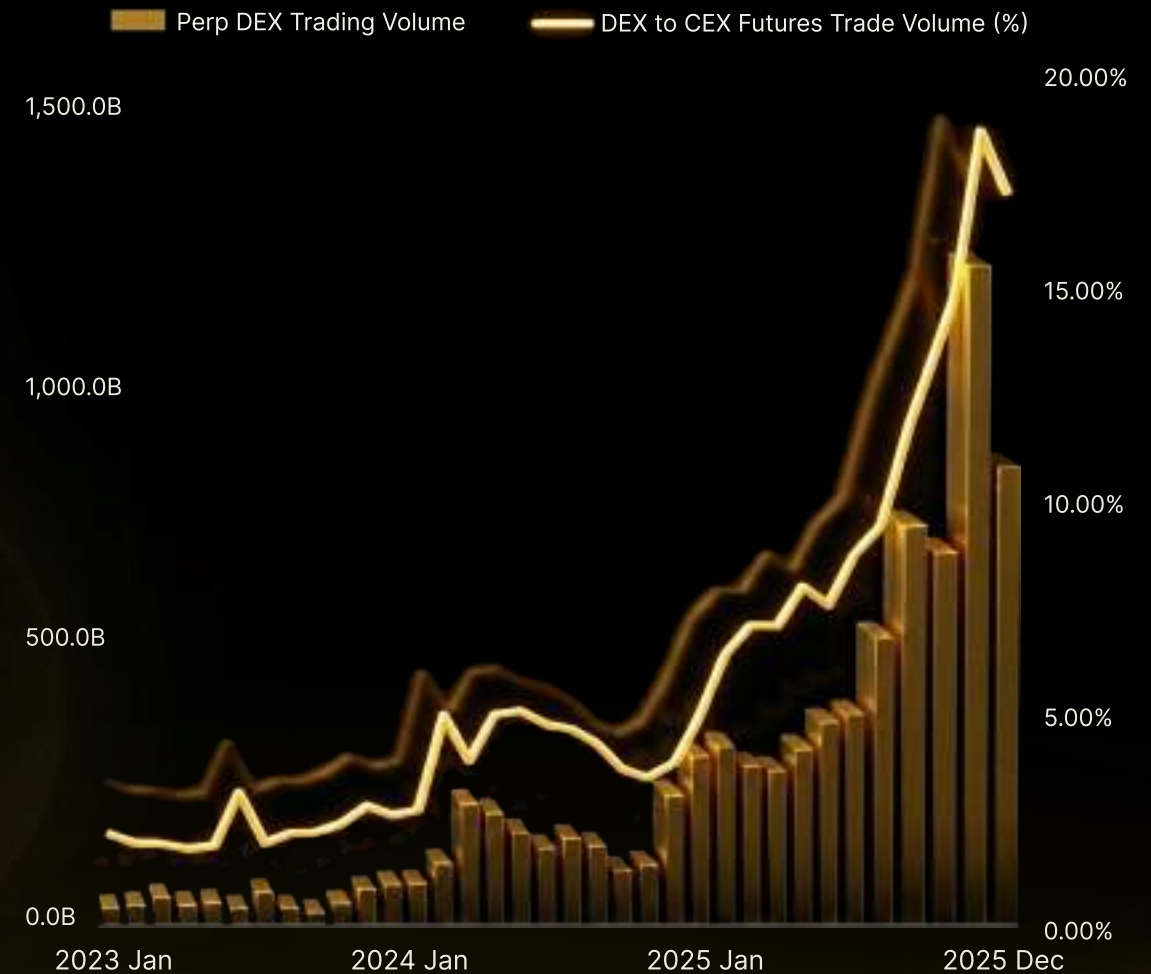

MARKET OPPORTUNITY

2025 marks the year of “CEX-to-DEX Migration.” Traders are seeking non-custodial solutions that match the execution speed of centralized engines and provide permissionless access.

The DEX to CEX futures ratio has grown by **8 times** in the last three years, with DEX to CEX futures trading ratio starting out at just 2.12% in 2023 January to 17% in 2025 December.

The cumulative trading volume of perp DEXs reached a total of \$12.09 trillion during 2025, **tripling** from \$4.1 trillion at the start of the year.

The "DEX Flipping" is Accelerating

EXISTING PAIN POINTS

Current Perp DEXs remain isolated silos, suffering from structural fragility and liquidity limitations.

Liquidity Fragmentation & Depth Issues

Most native DEXs rely on isolated liquidity pools or inefficient AMM models, resulting in high slippage for large orders and a lack of institutional-grade depth.

Architectural Rigidity & The "Long-Tail" Gap

Existing Perp DEXs are built on rigid smart contract frameworks that cannot handle the high volatility and unique risk profiles of emerging long-tail assets.

Systemic Frailty & High-Volatility Risk

DeFi-native clearing engines are often "closed-loop" and prone to failure during extreme market cascades, leading to a significant risk of protocol insolvency or stuck liquidations when the network is congested.

ADEN PRO-GRADE ORDERBOOK

The Most Comprehensive Asset Hub

ADEN offers an industry-leading range of assets, including major altcoins, memecoins, and US stock perpetuals. By utilizing a shared on-chain order book to bootstrap liquidity, ADEN solves the "long-tail asset" problem, providing a unified venue for diverse, global derivatives.

Advanced Risk Engine & Mark Price Protection

To combat "Scam Wicks" and liquidity droughts, ADEN employs a robust risk engine featuring tiered margin requirements. By using a sophisticated Mark Price calculation to trigger liquidations, the platform ensures execution stability and protects users during extreme market volatility.

Unified Ecosystem Integration

Built on the high-performance Gate Layer, ADEN offers a "connect-to-trade" experience with near-zero gas fees. Leveraging L2 infrastructure, users can easily onboard assets from major networks while benefiting from the protocol's high-speed settlement and security.

Sustainable Behavior-Based Incentives

ADEN drives long-term growth through its structured Genesis Points Program. Unlike speculative models, ADEN rewards genuine trading activity and position stability, ensuring that ecosystem incentives are aligned with value-adding, long-term participants.

ULTRA-FAST TRADING EXPERIENCE

- Sub-second execution powered by Gate Layer
- CEX-level interface with decentralized self-custody
- Zero-friction interaction without repetitive wallet signing
- Multi-Asset cross margin & Isolated Margin modes to maximize capital efficiency
- The most cost-effective platforms for market makers and arbitrageurs with ultra-low fees

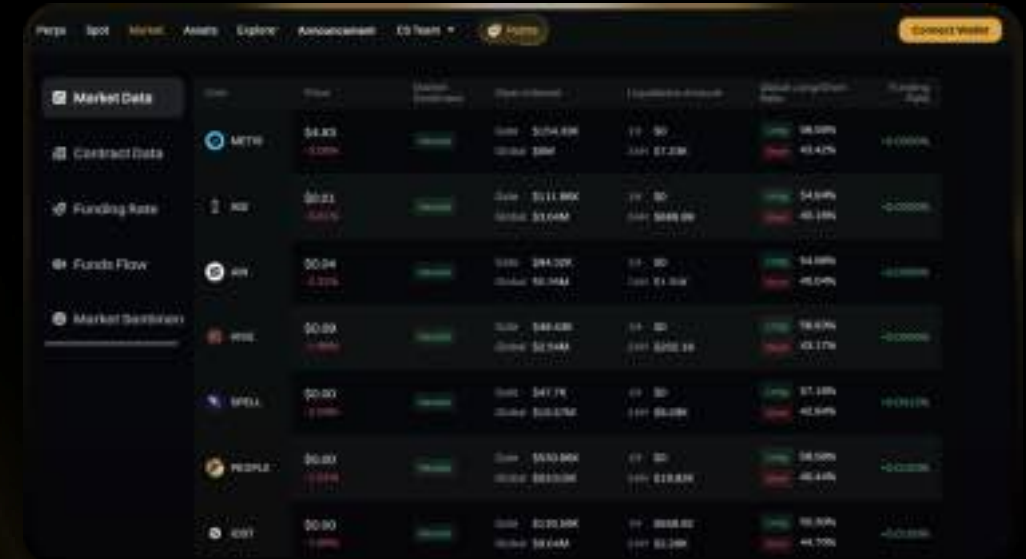

Market Dominance & Ecosystem Security

447+ Asset Coverage

ADEN hosts 447+ tradable assets, including major altcoins, high-volatility memecoins, and tokenized stock perpetuals. By leveraging a shared order book to bootstrap liquidity for niche tokens, ADEN solves the "long-tail asset" problem, providing a unified venue for diverse, global derivatives.

High-Velocity Settlement on Gate Layer

Built on the high-performance Gate Layer, ADEN offers a "connect-to-trade" experience with near-zero gas fees. Leveraging L2 infrastructure, users can easily onboard assets from major networks while benefiting from the protocol's robust high-speed settlement and security.

Asset	Price	Market Depth	Open Interest	Liquidity	Volume	Spread
ETH	\$4.85	10000	\$204.5M	10 - 50	10.5M	0.0001
ADA	\$0.21	10000	\$11.8M	10 - 50	5.5M	0.0001
DOT	\$0.04	10000	\$84.3M	10 - 50	14.5M	0.0001
LINK	\$0.09	10000	\$44.5M	10 - 50	16.5M	0.0001
WELL	\$0.00	10000	\$10.7M	10 - 50	17.5M	0.0001
PEOPLE	\$0.00	10000	\$10.5M	10 - 50	18.5M	0.0001
DOT	\$0.00	10000	\$10.5M	10 - 50	18.5M	0.0001

Algorithmic Price Protection & Risk Insulation

ADEN employs a sophisticated Mark Price algorithm and Tiered Margin system to ensure protocol stability. By utilizing weighted multi-source data, it effectively prevents "scam wicks" from market manipulation. Furthermore, its dynamic margin requirements adjust risk based on position size.

EXPLOSIVE GROWTH

Market-Leading Trading Volume

- Top 20 Perp DEX by volume
- Cumulative Perp Volume has surpassed **\$85B+**

Exceptional Revenue Generation

- **\$2.83M** in Trading Fee Revenue generated in Q4 2025 alone

Trading Fees (Million)

Milestones

1

Phase 1: Performance & Transparency

Focus: Scaling transparency through specialized Layer 3 architecture.

- **Layer 3 Data Infrastructure:** Launch of a dedicated L3 recording layer for full on-chain order and matching data. This achieves high throughput by streamlining consensus mechanisms without sacrificing data immutability.
- **Real-Time Data Sovereignty:** Implementation of real-time querying for pending order data, bringing transparency in line with top-tier institutional standards.
- **Traceability & Auditability:** Every matching event is recorded on-chain, ensuring a tamper-proof audit trail for all ecosystem participants.

2

Phase 2: Ecosystem Expansion

Focus: Empowering builders and bridging DeFi with social ecosystems.

- **Builder-Centric SDK:** Release of a robust SDK toolkit to allow brokers and developers to rapidly deploy customized trading environments on top of ADEN.
- **Social-DeFi Synergy:** Deep integration with Meme Go and Gate Fun projects. This bridge enables shared liquidity between trading and social sectors, fostering a flywheel of user-generated innovation.
- **Cross-Ecosystem Liquidity:** Creating a unified liquidity layer that allows assets to flow seamlessly between Gate Layer's specialized social and trading dApps.

3

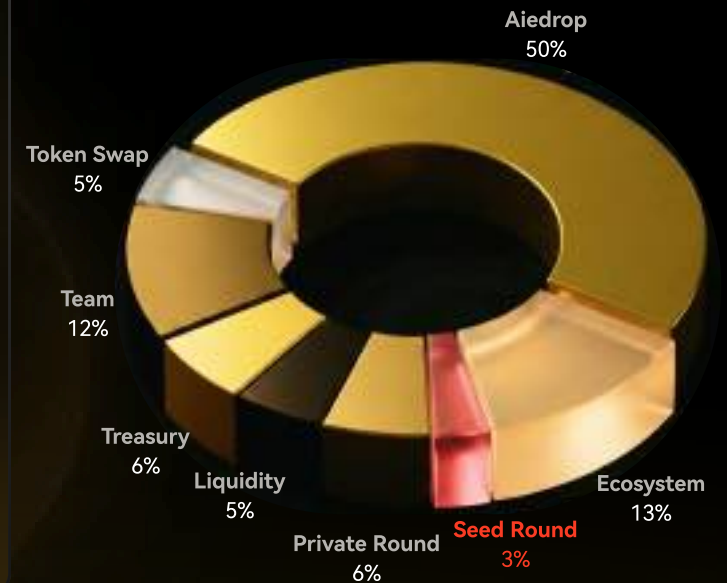

Phase 3: The Long-Term Vision

Focus: Setting the global standard for decentralized derivatives.

- **Global Liquidity Hub:** Establishing ADEN as the most liquid decentralized derivatives market worldwide, serving as the cornerstone of the Gate Layer ecosystem.
- **Sustainable Co-Creation:** A decentralized governance and incentive model where users, LPs, and developers co-create a transparent and efficient trading environment.
- **Next-Gen Finance:** Continuously setting new benchmarks for DeFi by combining the speed of centralized venues with the trustless nature of the blockchain.

Tokenomics

Distribution	Percentage	Token Amount	Vesting
 Airdrop	50.0%	500,000,000	1% at TGE, vesting linearly over 96 months
 Ecosystem	12.6%	126,000,000	0% TGE unlock, vesting linearly over 72 months
 Seed Round	3.0%	30,000,000	1 year cliff, 36 months vesting
 Private Round	6.0%	60,000,000	1 year cliff, 36 months vesting
 Liquidity	5.0%	50,000,000	fully unlocked at TGE
 Treasury	6.0%	60,000,000	0% TGE unlock, vesting linearly over 96 months
 Team	12.0%	120,000,000	1 year cliff, 72 months vesting
 Token Swap	5.4%	54,000,000	vesting linearly over 18 months since TGE

Core Team

CHO INBUM, Founder of ADEN

- Ranked **#1 creator across streaming platforms** for 6 consecutive years.
- Ranked **#1 in the Stock & Cryptocurrency category** on YouTube since 2024, with a peak viewership of **20,000+ concurrent live audience**.

CHO INBUM represents a rare convergence of high-concurrency technical expertise and financial community authority. And provides ADEN with a proprietary distribution engine and a high-trust retail funnel. By leveraging his dominant influence in the financial market, ADEN achieves near-zero Customer Acquisition Cost (CAC) and immediate scale, creating a unique competitive moat that traditional DeFi protocols cannot replicate. His proven track record in leading the Asian financial retail market ensures ADEN's large-scale user migration and deep community loyalty.

The Ask

ADEN is **raising \$3m at \$100m** FDV
